## About This Game

Waking up trapped in a tree, with no recollection of anything, you must explore a strange fragmented city floating in the sky to learn who you are and where you fit into the world.

- **Gravity Defying Gameplay** - Walk upside down, on walls, in fact walk anywhere you can get to. Your suction cup feet let's you stick to any surface.
- **Mind Bending Puzzles** - Solve complex logical & physical puzzles using your unique abilities.
- **Evolve & Explore** - Learn new abilities and use them to explore the fragmented city further.
- **Create Your Own Game** - Built-in level, map and character editors let's you build an entirely new game using simple tools. You'll be creating in minutes.

You play a You (short for Youropean), a small humanoid with suction cups instead of feet, which allows you to walk up walls and on ceilings. You must use your unique ability to solve a constantly evolving set of challenges. You will encounter physical puzzles, riddles, ferocious enemies, environmental hazards and more, in an abstract but logical universe that challenges your perception of the 3rd dimension.

Expand the game by building your own levels, cities and creating your own characters. The entire game is created using the

---

incredibly easy to use built-in editing tools. Unlock more than 450 building blocks, construct amazing levels and build entire adventures by linking the levels together on the map.

Youropa is a game about breaking rules, being upside down and thinking outside the box.

There's online flash games for free a lot better than this. Not being able to even toggle sounds or music is a big red flag from the start. No instructions or ideas of what is happening in game, for instance there is a random debuff the game puts that drains your health constantly until you die, no idea why or how to make it stop. I tried to give it a shot but when I finally passed the first stage I got to the boss whose attacks are completely unavoidable. When a game doesn't give you a chance to survive and no idea how to do learn from it, it makes it a bad experience. Really bad game.. my childhood\uff01. t simulator 2015.  
[https://www.youtube.com/edit?o=U&video\\_id=GKZzmXpvBHA](https://www.youtube.com/edit?o=U&video_id=GKZzmXpvBHA) Heres My Review Since i Didnt know how to play and Got it from KeyMail. It puts too much focus on being an economy simulator to be an enjoyable game. I like peaceful strategy games, but the gameplay of Patrician III gets monotone very quickly. There's only so much fun one can have by observing supply and demand, trying to gain profit and provide goods for a population. The whole gameplay is just about looking at prices, prices, prices...

---

The good:

- 1- This is a short RPG maker game. - I don't mean it is bad because of this -.
- 2- Some parts of the game are polished well: for example the animation during battles.
- 3- no random encounters. You only fight an enemy when you collide with it - which I think is good -.

The bad:

- 4- Sadly it seems it suffers from the same problem that many other rpg maker games have: the game is not balanced. I mean you could quickly level up and breeze through the game and care not for any strategy while fighting.
- 5- Another issue is the story: which is very poor.
- 6- No side quests
- 7- Finally I got the feeling that this game needs some polish before releasing.

I am really feeling bad for giving this game a negative review, but this is how I felt while playing it. I think this game could have been much better if it had a better story.

. Game is really cool in theory and is actually really fun at first. Unfortunately a few levels in the monster balance really begins to fall apart and the game ends up requiring a lot of luck to get through. Would recommend if the game were quicker and easier to restart, however later fights can be quite slow and dull.. This game is pretty fun, I enjoyed playing it through and messing around with all the dev stuff :3. This was one of the first games I bought here, and I don't regret it. This game is very short - only a Part 1 in what I assume is an impending series - but a fun point-and-click adventure with some pleasing riddles and puzzles to solve. Not to mention that "gorgeous" doesn't describe the way the game's set looks; I'm likely to replay it just to watch the camerawork, motion and scenery in action.

As mentioned above, it is definitely a Part 1; the game is extremely short, and that should be taken under consideration upon purchase. However its sequel, Lumino City, is out now. I look forward to grabbing it and adding my review to this one.. WHAT ARE THIS

lol

I'm mad at this game because there was no silence >=(. It's an amazing tribute to old school fight games!

The strongest points of One Strike are the fact of each duel is a mini heart attack at the end, the weight of animations and the screenshake create a very good mood when you cut some necks or strip a belly off! The music and SFX are dramatic and the pixel art graphics are beautiful!

Each character has a very particular way of fight, which is great cause you have to try a lot of different tactics to win.

This game has a very cool mood into the samurai way-of-life!

#### **v1.0.2.1:**

- \* Redone car engine sounds
- \* Realism: Added more background visuals
- \* Arcade: Improved background visuals (made them bigger and "more 3D")
- \* Added simple test driving in the main menu

I'm thinking of adding online multiplayer and even though I haven't yet decided how I'm going to do it, I'm already experimenting with some stuff (test drive in the menu is part of it).

. Incoming Update!:

**Upcoming Update:**

-2 New type enemy

-Now we have 3 health

-Throwing Kunai to new enemy

-New Death animation effect

-Online ScoreBoard. **19.05.02 patch note:**

Hello, this is the first patch note. I have modified some bugs below.

---

## PATCH NOTE

### -Add Full Screen 1, 2 Modes

"Full screen 1" is a full screen in window mode, and you can see Window border or Windows task bar. (The screen is not minimized when the Alt+ tab button is clicked.)

"Full screen 2" is a full screen without a Windows task bar, but game play can cause some noise on the screen. (The screen is minimized when the Alt+ tab button is clicked.)

- Modify UI sink according to monitor resolution
- a bug in which games are frozen in some rooms where the prism has to be moved.
- Modifying the inventory window to the tab key
- other small bugs

Below is the list that needs to be modified.

## TO BE PATCH

- When playing a game with some headset, the game does not move after loading screen.
- Game frames down when playing on a laptop. **Progress update. Where are we at?:**

So where are we currently at in the development process?. **PCMark 10 Update Released:**

UL benchmarks use a component called SystemInfo to identify the hardware in your system. This patch updates SystemInfo to version 5.12.

## SystemInfo 5.12. Update 0.5.5.4 New Unit, Genetics and Winemaking:

- New model of the unit
- New models of armor
- New models of weapons
- New animations of the unit

- 
- Added genetics parameters for units
  - Genetics is affected by food intake
  - Genetics affect the health, strength and endurance of units
  
  - Added new technology winemaking
  - Grape juice can be obtained in the extractor
  - With the barrel you can insist grape juice
  - You can not move, clean or add infusion items in the barrel. Otherwise, the insistence will begin anew
  
  - Added a button to the news page in the game menu
  - Centering the unit when you click on the unit panel again
  - Added processing of chains in the crusher
  - The minimum reward for hunting is 100 points 1000 GC
  - Added mining of coal dust with a hammer. **Minigame update:**

Greetings Commandos,

As you may know, it's becoming increasingly difficult to develop games as an indie business. Given the current economic recession, the alarming number of asset flips and the devaluation of **Doge coin**, we have no other alternative, but to include in-game advertising.

I know... I know a lot of people are not going to be happy about this. After much consideration, **2dengine** has decided to partner strictly with legit, top-tier advertisers so there is no need for concern.

Special thanks to our sponsors, **Silly-Conman-Echo Productions** and check out their new title **Goo Chungus 174**. This promising sequel is not planned for a Steam release, but should be coming next week to torrents (in Croatia). So definitely keep an eye out for that!

Also, check out 8-Bit Commando's new minigame, called **Bird Hunt**! This little gem is inspired by **Duck Hunt** and unlocks after you complete every mission in the game's story mode. Leaderboards are included too!

This update is brought to you by DPS: “**Digihom** Postool Service, the undisputed #1 leader when it comes to the business of #2!”
